# Velocity Risk

---

## Small Commercial Update

### Underwriting Guidelines Update

We have updated our [minimum deductible guidelines](#), which vary by state, distance to coast, year built, construction type, occupancy and TIV. The system will automatically select the appropriate deductible. The largest deductible based on the combination of factors will apply.

Be sure to access the Velocity Risk University website frequently for additional training materials and product details. We update and add new content to the University often.

## Portal Navigation - Search Functionality Update

Additional search functionality has been deployed to the portal ([my.velocityrisk.com](http://my.velocityrisk.com)) including search by insured name, quote, application, and policy number. All search results will take you to the correct policy administration system.

When searching for a pending renewal quote, you can search by the named insured, application number, or policy number. The available renewal quote will be in an application status labeled "AP-" and the link will take you to the system where the renewal quote is ready for your review.
