

# Velocity Risk

## What's New with Velocity Small Commercial

We are thrilled to announce additional enhancements to our quoting platform, aimed at streamlining and improving your workflow. These updates are live as of April 5th.

- **Earlier Quotes in Florida:** New and Renewal quotes will now be available **35 days** before the effective date, up from 20 days.
- **Expanded Capacity:** We've recently increased our capacity to write policies with TIV's up to **\$10 million**.
- **Streamlined Underwriting:** We've eliminated several unnecessary underwriting approval rules to streamline processes, allowing you to write more business with fewer obstacles. One of these changes **removes previous premium size restrictions**.
- **Greater Flexibility in FL, LA, and TX:** By removing certain ineligibility rules in these states, we are offering you increased flexibility to write business with Velocity.

### Reminder:

**We released our new Appetite Checker Tool Velocity Breeze this week.**

This intuitive tool is designed to streamline the process of assessing risk acceptability, making it a Breeze to determine eligibility. In less than 30 seconds you can get an indication of risk appetite.

Velocity Breeze is available within your [Velocity Portal](#).

In addition, we recently made several system updates to increase quoting efficiency:

- **Basic Details:** We've simplified this section by removing the Mailing Address fields, which have been relocated to the Closeout section. The Primary Risk Address is now entered on this screen and will seamlessly flow into the Location Detail section.
- **Underwriting Questions:** Verification of question answers has been moved to the top of the page to enhance navigation. A new question regarding converted dwellings has been relocated here and removed from the Building section.
- **Location Detail:** The Primary Risk address from the Basic Details section is prefilled eliminating unnecessary clicks. We've also added new buttons 'Add Building to this Location' and 'Add New Location' on this screen enhancing workflow efficiency.
- **Building Details:** This section has been reorganized into separate segments for quicker navigation. Supplemental questions have been moved lower on the screen and defaulted to increase data entry speed. The 'Add Building to this Location' and 'Add Another Location' buttons are now conveniently available here, streamlining workflow.
- **Premium Review (Closeout):** The Mailing Address section has been relocated here as it's required to bind. If the Mailing Address differs from the Location Address (as indicted on the Basic Details section), the Mailing Address detail will be prefilled.

We are eager for you to explore these additional new features and confident you will find the updates a positive experience for your workflow. Expect more updates in the coming
